

Reddam Jaswanth

Generative AI Engineer

jaswanthredam@gmail.com | [linkedin.com/in/redamjaswanth](https://www.linkedin.com/in/redamjaswanth) | github.com/RedamJaswanth

CAREER OBJECTIVE

Seeking opportunities as a Generative AI Engineer where I can apply my knowledge of Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, and Machine Learning to build intelligent, scalable AI solutions while continuously learning, contributing, and growing in a collaborative environment.

SUMMARY

Passionate Generative AI Engineer dedicated to building intelligent AI applications that solve real-world problems. Experienced in transforming ideas into practical AI solutions using LLMs, RAG, AI Agents, and Python. Continuously enhancing skills in Generative AI, Machine Learning, Prompt Engineering, and AI Automation to build production-ready AI systems.

SKILLS

Generative AI

Python, LLMs, Prompt Engineering, LangChain, Google Gemini API, RAG, AI Agents, AutoGen

Machine Learning

Scikit-learn, Pandas, NumPy, Matplotlib, NLP

AI Development

Streamlit, FastAPI, REST APIs, ChromaDB, Vector Databases

Database

MySQL, MongoDB

Tools

Git, GitHub, VS Code, Jupyter Notebook, Postman, Ollama

Other

OOP, Problem Solving, API Integration, Workflow Automation, Responsive Design, Team Collaboration

PROJECTS

Context-Aware PDF Query System (RAG)

Python · Google Gemini API · LangChain · ChromaDB · Streamlit · RAG

Built an AI-powered document Q&A application that lets users upload PDF files and ask questions in natural language. Retrieves relevant context using Retrieval-Augmented Generation (RAG) and generates accurate responses using Google Gemini.

EDUCATION

Master of Computer Applications (MCA)

Annamacharya Institute of Technology & Sciences (AITS), Rajampet · Graduated 2025

STRENGTHS

Fast Learner & Problem Solver · Team Player & Continuous Learner
